# Enviro Waste vacuum services offers a neat, convenient way to service and maintain your non-hazardous sludge & solid waste

## SEPARATOR SERVICE

As a last line of defense, your oil water separator protects you from contaminated waste discharge into our water supply. Enviro Waste offers a service schedule & document recording service to protect you from potential environmental liability from under serviced, over filled oil water separators. Our equipment & service technicians are ready at a moments notice for emergency overflows and plugged lines, as well as scheduled maintenance services as required by law in most areas.

## TANK MEASUREMENTS

Proper quotations depend on accurate measurements of tank or vessel size. With proper access Enviro Waste accurately measures waste so you won't be surprised with higher costs when the service is done.

## SPILL RESPONSE

We are on call 24/7. Enviro Waste is always fully stocked with supplies and absorbents to handle any size job. Our drivers and service technicians are haz-wopper and TWIC certified to handle tanks and spills of any size. Our large fleet and 24 hour facilities allow us to work until the job is done.

## WASTE CLASS SEPARATION

Our facility and equipment allows us to not only separate a majority of multiple waste streams on site but we also strive to classify the waste streams in the most cost effective way possible. Our experience, resources and equipment reduce your liability and save you money.

# NO JOB IS TOO BIG OR TOO SMALL!
